Learning about Equipment Health View

Equipment Health View (EHV) is a web-based application that consolidates equipment information from Railinc's Umler®, Equipment Health Management System (EHMS), Damaged and Defective Car Tracking (DDCT), and Equipment Advisory (EA) systems, as well as mileage information from the Event Repository.

Overview

Equipment Health View enables authorized users to:

- View a subset of Umler data for an Equipment ID
- Report repairs and associate component IDs
- Report inspections for an Equipment ID for Equipment Advisories, EHMS, and Umler
- View Equipment Advisory notices for an Equipment ID
- View alert status for an Equipment ID
- View data summaries for an Equipment ID
- View damaged and defective status for an Equipment ID
- View mileage for an Equipment ID
- View inspection status for an Equipment ID
- View location status for an Equipment ID

Prerequisites

To attain full use of EHV, contact your Company Admin and request the following application-specific SSO permissions:

- EHV
 - EHV Generic Access
- Umler
 - Umler Access for Maintenance
 - Umler Access for Query
 - Umler Inspection Rights (for reporting inspections)
- EHMS
 - Generic Access
 - Car Repair History (for reporting any repairs and inspections)
- DDCT
 - Handling Carrier (if applicable)
 - Car Owner (if applicable)
- Equipment Advisory
 - Equipment Advisory Query
 - Equipment Advisory Rept Inspections
- CRB
 - CRB Billing Repair Card User

User Tools and References

Refer to the following guides for information about application-specific reporting and requirements:

- [*Umler User Guide*](#)
- [*EHMS User Guide*](#)
- [*Equipment Advisory User Guide*](#)
- [*DDCT User Guide*](#)
- [*Component Tracking User Guide*](#)
- [*CRB Procedures Manual*](#)
- [*AAR Field Manual*](#) (link to purchase)
- [*AAR Office Manual*](#) (link to purchase)

System Requirements

For information about the system requirements of Railinc web applications and for information about downloading compatible web browsers and file viewers, refer to the [*Railinc UI Dictionary*](#).

Accessing the Railinc Customer Success Center

The Railinc Customer Success Center provides reliable, timely, and high-level support for Railinc customers. Representatives are available to answer calls and respond to emails from 7:00 a.m. to 7:00 p.m. Eastern time, Monday through Friday, and provide on-call support via pager for all other hours to ensure support 24 hours a day, 7 days a week. Contact us toll-free by phone at 877-RAILINC (1-877-724-5462) or send an email directly to csc@railinc.com.

Getting Started

The Equipment Health View application is accessed using the Railinc Single Sign On (SSO), which can be accessed from the Railinc portal at <https://public.railinc.com/> and log into SSO by selecting the **Customer Login** link in the top right corner.

Register to Use Railinc SSO

Before you can use Equipment Health View, you must register to use Railinc Single Sign On, which provides access to Railinc applications. Refer to the [Single Sign-On and Launch Pad User Guide](#). Once you are registered to use SSO, you can use SSO to request access to EHV.

Requesting Equipment Health View Access

After authorization to use Railinc SSO is received, you must request access to EHV (see [Exhibit 1](#)). Refer to the [Single Sign-On and Launch Pad User Guide](#) for more information. See [Prerequisites](#) for additional requirements.

Exhibit 1. EHV Request Permission

The screenshot shows a web form titled "Request Application Access by Role" with a breadcrumb "Home / Request Application Access by Role". At the top right, there is a green "ACTIVE" status indicator with a dropdown arrow. Below this, the form is for "Equipment Health View". A progress bar at the top of the form shows three steps: "1 Select Roles" (active), "2 Confirm", and "3 Done". The "Select Roles" section contains two checkboxes: "EHV Generic Access (MARK required)" and "EHV Road Admin (MARK required)". Each checkbox has a description of the role. Below the checkboxes is a "Comments..." text area. At the bottom right, there are "Return" and "Next" buttons. A small "0/255" character count is visible next to the "Next" button.

When you receive e-mail notification of access to EHV, you can log on and begin using EHV.

Logging In

To log into Equipment Health View:

1. Open your internet browser and enter <https://public.railinc.com> to open the Railinc website.
2. Select the **Customer Login** link in the upper right of the page. The Account Access page is displayed.
3. Enter your **User ID** and **Password**. Select **Sign In**. The Railinc Launch Pad is displayed.
4. In **My Applications**, select **Equipment Health View**.

The **User Mark Selection** popup is displayed ([Exhibit 2](#)). Use the drop-down list to select the desired company and select **Submit**.

Exhibit 2. User Mark Selection

A screenshot of a 'User Mark Selection' popup window. The title 'User Mark Selection' is in red. Below it, there is a label 'Select a Mark' in blue. Underneath is a dropdown menu with 'RAIL' selected and a blue arrow pointing down. At the bottom right, there are two buttons: 'Cancel' and 'Select'.

The Equipment Health View Home page is displayed ([Exhibit 3](#)).

Note: The logged in user at the top right of the Welcome page reflects the selected company for multi-company users.

Exhibit 3. Equipment Health View Home Page

The screenshot displays the Equipment Health View Home Page with a sidebar on the left and a main content area on the right. The sidebar contains a 'Search' section with a text input and 'Clear'/'Search' buttons, followed by 'Equipment Location', 'Umler Registry', and 'Umler Inspections' sections, each showing 'No [category] data found for equipment' and a 'Launch [category]' button. The main content area features six modules: 'Repair and Inspection Reporting' (No equipment selected), 'Umler Inspections' (No UMLER inspection data found for equipment, Launch Umler), 'Equipment Health Management System' (No open alerts/data summaries found for equipment, Launch EHMS), 'Damaged and Defective Car Tracking' (No DDCT items found for equipment, Launch DDCT), 'Equipment Advisory' (No equipment advisory assignments found for equipment, Launch Equipment Advisory), and 'Mileage' (No equipment mileage records found for equipment).

Logging Out

Select the **Sign Out** link to end an Equipment Health View (SSO) session. You are returned to the SSO Login Page.

If multiple SSO applications are open (in separate browser windows), and you want to close only one, close the unwanted window using **X**, or **Alt+F4**. Do NOT select the **Sign Out** link—it ends the entire Single Sign-On session (and *all* applications).

Time Out/Unauthorized

When the Equipment Health View session has been idle for 30 minutes, messages similar to [Exhibit 4](#) are displayed. You must log back into EHV to continue working. You may see the red prompting messages if you don't have permissions to view or submit information from respective applications.

Exhibit 4. Timeout/Unauthorized Messages

The screenshot shows a 'Session Timeout' dialog box on the left with the message 'Your session has timed out. Please log back in to continue.' and a 'Close' button. On the right is a list of error messages, each with a red 'X' icon and a close button. The messages are: 'Not authorized to submit this Air Brake Test.', 'Not authorized to submit this Air Brake Test.', and 'Report UMLER Inspection - Failed'. The top of the list has a header 'Report ABT' and 'M - Manual'.

Using Equipment Health View

Equipment Health View is a dashboard-style interface that enables you to see pertinent information from various Railinc applications at a glance. Information from different applications is displayed in *portlets* as shown below.

A system error has occurred, please try again. If you continue to receive this error contact Railinc Support.

Certain portlets enable you to launch the source application for the portlet. To do this, select the launch link at the bottom of the portlet. If you have authorization, the source application opens, and you can use that application. If you do not have authorization, an SSO Unauthorized Access Attempt Warning is displayed.

The following applications are available to launch from EHV:

- Umler
- EHMS
- DDCT
- Equipment Advisory

Hint: Click the launch link to open the application in a new browser window.

To return from a linked application, select the Launch Pad link at the top of the application, reselect **Equipment Health View**. The most recent search remains.

Several portlets have a refresh icon (🔄) in the upper right corner. Select the icon to refresh the contents of that portal.

The following sections describe EHV functionality:

- [Using the Search Portlet](#)
- [Using the Equipment Location Portlet](#)
- [Using the Umler Registry Portlet](#)
- [Using the Repair and Inspection Reporting Portlet](#)
- [Using the Umler Inspections Portlet](#)
- [Using the Equipment Health Management System Portlet](#)
- [Using the Equipment Advisory Notices Portlet](#)
- [Using the Damaged and Defective Car Tracking Portlet](#)
- [Using the Mileage Portlet](#)
- [Accessing the User Guide](#)

Using the Search Portlet

To use the Search portlet to search for a specific piece of equipment or a range of equipment:

1. Type an Equipment ID or a range of Equipment IDs in the Search box and select **Search**. Results found are shown below.

Note: You can view up to 200 IDs in the results list. Wildcards are not supported.

Exhibit 6. Search Results for Multiple Equipment IDs

The screenshot displays the Search Portlet interface. On the left, the 'Search' section has a text input field containing 'RAIL1-50' and buttons for 'Clear' and 'Search'. Below this is a message: 'Please click on the View button for car results'. A list of Equipment IDs is shown, with 'RAIL0000000003' selected and a 'View' button next to it. Below the list is a section for 'Equipment Location' with a warning icon and text: 'Location information for equipment RAIL0000000003 is confidential'. Further down is the 'Umler Registry' section, which states 'No UMLER data found for equipment RAIL0000000003' and has a 'Launch Umler' button.

The main content area on the right shows several portlets for the selected Equipment ID 'RAIL0000000003':

- Repair and Inspection Reporting- RAIL0000000003**: A form with fields for Equipment ID*, Repair Date* (9/26/2022), SPLC*, Performer*, and Reporter* (CSXT). It includes a 'Select Action' dropdown and 'Clear' and 'Submit' buttons.
- Umler Inspections**: States 'No UMLER inspection data found for equipment RAIL0000000003' and has a 'Launch Umler' button.
- Equipment Health Management System Alerts**: A table with columns: Alert Type, Location, Alert Level, At Level Since, Event Name, Action, and Action. The table contains three rows of data:

Alert Type	Location	Alert Level	At Level Since	Event Name	Action	Action
MV Coupler E Securement	Coupler B	ATSI Window Open	12/11/2019	MIS_RETAINER	Inspection	
ABD	Wheel Bearing 02L	AAR A1	08/29/2019	Cup_SA_Eq_1	Inspection	Repair
ABD	Wheel Bearing 02R	AAR A1	08/29/2019	Cone_SA_Eq_1	Inspection	Repair

 Below the table, it states 'No open data summaries found for equipment RAIL0000000003' and has a 'Launch EHMS' button.
- Damaged and Defective Car Tracking**: States 'No DDCT items found for equipment RAIL0000000003' and has a 'Launch DDCT' button.
- Equipment Advisory**: States 'No equipment advisory assignments found for equipment RAIL0000000003' and has a 'Launch Equipment Advisory' button.
- Mileage**: Displays a system error message: 'A system error has occurred, please try again. If you continue to receive this error contact Railinc Support.'

When a range is submitted, the equipment list displays below the Search portlet. Data obtained for the **first** Equipment ID in the list is displayed in the other portlets.

To view information for a different Equipment ID in the equipment list, scroll to a different ID and select the **View** button associated with that ID. The data is refreshed in the other portlets.

2. To execute a new search, overwrite the Search field and select the **Search** button.

Using the Equipment Location Portlet

The Equipment Location portlet displays equipment location information from the Event Repository. This portlet displays the location (city/state) and last move information to the car owner.

Exhibit 7. Equipment Location Sample

Note: If no events have been reported, the Equipment Location portlet displays the following message: No location data found for equipment [RAIL0000000347].

If you are not the car owner, the portlet displays “Location information for equipment *<car number>* is confidential”.

Using the Umler Registry Portlet

The Umler Registry portlet displays information about the searched Equipment ID. Content varies based on the information available from Umler.

Exhibit 8. Umler Registry Sample

Umler Registry

General

Stenciled Mark Owner	RAIL
Status Code	P - PRE-REGISTERED
Built Date	10/10/2000
Equipment Type Code	M550

Load Limit	40000 lb

Specifications

Truck Count	2
Axle Count	4
Outside Length	45 ft, 1 in

[Launch Umler](#)

Note: Other than launching Umler, no actions are available from this portlet.

To view the complete data for the selected Equipment ID, select the **Launch Umler** link at the bottom of the portlet and query the Equipment ID. Refer to the [Umler User Guide](#) for information about performing an Equipment ID query in Umler.

Using the Repair and Inspection Reporting Portlet

The Repair and Inspection Reporting portlet enables authorized users to submit various inspections and repairs, including multiple entries that can be submitted at the same time ([Exhibit 19](#) and [Exhibit 20](#)), and requires EHMS Generic Access and EHMS Car Repair History permissions.

This portlet can be used in two different ways:

- 1) Choose the **Select Actions** drop-down list to select repairs or inspections.
- 2) This portlet is automatically invoked when you select an Inspection or Repair link in another portlet.

For all entries, the default input fields (**Equipment ID**, **Repair Date**, **SPLC**, **Performer**, and **Reporter**) are required. Equipment ID and Reporter are defaulted to selected equipment and the [User Mark Selection](#) when opening EHV.

Exhibit 9. Repair and Inspection Reporting by Equipment ID Form

Repair and Inspection Reporting - RAIL0000000346

Equipment ID * RAIL0000000346 Repair Date * 7/25/2019 x **SPLC *** **Performer *** Reporter * BNSF

Select Action ▼ Clear Submit

The various repairs or inspections can be selected from the **Select Action** drop-down list.

Exhibit 10. Repair and Inspection Reporting Actions List

Repair and Inspection Reporting- RAIL0000000346

Equipment ID * IL0000000346 Repair Date * 9/8/2022 x **SPLC *** **Performer *** Reporter * RAIL

Select Action ▼

- Report Repair
- Report EHMS Inspection
- Report EA Inspection
- Report ABT
- Report Door Lube Inspection
- Report Vehicular Flat Car Certification

Clear Submit

When an action is selected, entry fields open between the default input fields in the portlet and the **Select Action** drop-down list.

Exhibit 11. Repair and Inspection Reporting Action Selected

General Interface Description:

- The type of action is indicated at the left (EHMS Repair).
- For all entries, the default input fields (**Equipment ID**, **Repair Date**, **SPLC**, **Performer**, and **Reporter**) are required.
- If action was selected in error, it can be removed using the minus icon (⊖) at the left.
- The **Submit** button submits the input to the appropriate system.
- The **Clear** button removes all selected actions from the portlet (*including processed actions*).
- Input fields for each action vary. These are described in the following sections:
 - [Report Repair](#)
 - [Report EHMS Inspection](#)
 - [Report Equipment Advisory Inspection](#)

Umler Inspections:

- [Report ABT](#) – all these are the same as Report ABT:
 - Report Door Lube Inspection
 - Report Vehicular Flat Car Certification
 - Report Autorack Certification
 - Report Autorack Repair
 - Report Reflectorization Event
- [Report Autorack Inspection](#)
- [Report Car Grade Inspection](#)

Report Repair

Note: You must have CRB and/or EHMS Car Repair History SSO permissions to report car repairs.

When you select **Report Repair** from the drop-down list, the Report Repair fields are displayed.

Exhibit 12. Repair and Inspection Reporting Report Repair Form

1. Use the calendar icon () to select the **Repair Date** to be reported.
2. Enter the **SPLC** where the repair was done or use the lookup icon () to search for the SPLC.
3. Enter the MARK of the **Performer** (e.g., a shop mark).
4. The **Reporter** defaults to your company.
5. Complete the following fields in accordance with the *AAR Field Manual* and the *AAR Office Manual*:
 - a. **Job Code**
 - b. (conditional) **Applied Qualifier**
 - c. (conditional) **Why Made**
 - d. **CRB Location**
 - e. (conditional) **Component ID**—from Umler Component Registry
6. Once all required fields are entered, select **Submit**. The portlet displays the reported repair ([Exhibit 13](#)) and success or error messages. For errors messages (error messages are in red), correct the inputs and **Submit** again. For more message examples, see [Exhibit 19](#) and [Exhibit 20](#).

Exhibit 13. Repair and Inspection Reporting Success Message

The screenshot shows a success message for a repair report. The form title is "Repair and Inspection Reporting- RAIL0000000347". It contains several input fields: Equipment ID * (RAIL0000000347), Repair Date * (12/2/2019), SPLC * (123456), Performer * (RAIL), and Reporter * (RAIL). Below these, there are fields for Job Code * (3334), A. Qualifier, Why Made, CRB Location * (1), and Component ID. A green success message box states: "EHMS: Submitted closures Succeeded. 1 closures Submitted, 0 Failed Validation, 0 Had Errors." At the bottom, there is a "Select Action" dropdown menu, a "Clear" button, and a "Submit" button.

No further edits can be done to the submitted entry. A new action can be selected.

EHMS Inspection

When you select **Report EHMS Inspection** from the **Select Action** drop-down list, the EHMS Inspection fields are displayed. Refer to the [EHMS User Guide](#) and the *AAR Field Manual* for details.

Exhibit 14. Repair and Inspection Reporting EHMS Inspection Form

The screenshot shows the EHMS Inspection form. The title is "Repair and Inspection Reporting- DM0000110034". It includes fields for Equipment ID * (DM0000110034), Repair Date * (10/24/2025), SPLC * (with a lookup icon), Performer * (with a red border and "Performer required" label), and Reporter * (RAIL). Below these, there is a red "EHMS Inspection" button, Inspection Type * (MV_COUPLER_SECU), Component Type * (with a dropdown menu showing "BASE" and "COUPLER"), Reason * (with a red border and "Reason required" label), and CRB Location * (NA). At the bottom, there is a "Select Action" dropdown menu (set to "Select"), a "Clear" button, and a "Submit" button.

1. The **Repair Date** defaults to the current date. Use the calendar icon (📅) to select the Repair/Inspection Date to be reported.
2. Enter the **SPLC** where the repair was done or use the lookup icon (🔍) to search for the SPLC.
3. Enter the MARK of the **Performer** (e.g., a shop mark).
4. The **Reporter** defaults to your company.
5. Select the **Inspection Type**. When a Machine Vision alert inspection (beginning with **MV_**) is selected, the conditional **Component Type** field is added and may be pre-populated. If a Machine Vision alert represents more than one component, select the appropriate **Component Type** from the drop-down list ([Exhibit 14](#)).

6. Select the **Reason**.
7. Enter the **CRB Location** that is specific to the alert (refer to *AAR Field Manual*, Rule 83).
8. Once all required fields are entered, select **Submit**. The portlet displays the reported repair (similar to [Exhibit 13](#)).

Equipment Advisory Inspection

When you select **Report EA Inspection** from the drop-down list, the Equipment Advisory Inspection fields are displayed.

Exhibit 15. Repair and Inspection Reporting Equipment Advisory Inspection Form

Launch EHMS

[Exhibit 20](#) shows the portlet after submission. The messages with green check icons show that the transactions were successful, and closures executed. Look for responses from the application portlets, and you may need to refresh each portlet to view updates. In this example, the other portlets reflect recent updates (Umler), or removal of completed transactions (only one alert remains in EHMS).

Exhibit 20. Multiple Repairs and Inspection After Submission

Repair and Inspection Reporting- RAIL0000000109

Equipment ID *	Repair Date *	SPLC *	Performer *	Reporter *

Launch EHMS

Although no further actions can be taken on the submitted repairs and inspections, you can enter additional inspections or repairs by using the **Select Action** drop-down list, or by selecting a link in another portlet.

If the Repair and Inspection Reporting portlet becomes crowded, select **Clear** to remove the entries (whether processed or not).

Using the Umler Inspections Portlet

The Umler Inspections portlet displays Umler Inspection information. Inspections are listed by type.

Exhibit 21. Umler Inspections Sample

Umler Inspections		
<u>Air Brake Test</u>		
Inspection Date Done	10/25/2018	Inspection
ABT Due Date	10/25/2019	
ABT 5-8 Year Due Date	10/01/2023	
<u>Door Lube Inspection</u>		
Inspection Date Done	07/02/2019	Inspection
<u>Reflectorization Event</u>		
Inspection Date Done	07/03/2019	Inspection
Launch Umler		

Note: When you select an **Inspection** link, the Repair and Inspection Reporting portlet opens the corresponding inspection entry field to allow you to input a new inspection (refer to [Exhibit 16](#) after selecting the Inspection link for ABT).

Select the refresh icon () to update the Umler Inspections portlet after submitting inspections.

To view the complete data for the selected Equipment ID, select the **Launch Umler** link at the bottom of the portlet and query the Equipment ID. Refer to the [Umler User Guide](#) for information about performing an Equipment ID query in Umler.

Using the Equipment Health Management System Portlet

The Equipment Health Management System portlet displays EHMS alerts and data summaries for the highlighted Equipment ID. A typical listing of alerts and data summaries is shown in [Exhibit 22](#).

Exhibit 22. Equipment Health Management System Sample

WPD Data Summary	Wheel 01R	No alert	
WPD Data Summary	Wheel 03R	No alert	
WPD Data Summary	Wheel 04L	No alert	

Launch EHMS

Note: When you select an **Inspection** link, the Repair and Inspection Reporting portlet opens the EHMS Inspection entry field to enable you to input a new inspection (see [Exhibit 14](#)). When the **Repair** link is selected, the Repair and Inspection Reporting portlet opens the Report Repair entry field to enable you to input a new repair (see [Exhibit 12](#)).

Select the refresh icon (↻) to update the EHMS portlet after submitting inspections or repairs.

To view the complete EHMS data for the selected Equipment ID, select the **Launch EHMS** link at the bottom of the portlet and query the Equipment ID in EHMS. Refer to the [EHMS User Guide](#) for more information about EHMS Equipment ID queries as well as details about EHMS alerts and data summaries.

Using the Equipment Advisory Notices Portlet

The Equipment Advisory Notices portlet displays Equipment Advisory notices for the highlighted Equipment ID. Representative Equipment Advisories are shown in [Exhibit 23](#).

Exhibit 23. Equipment Advisory Sample

Equipment Advisory 						
Advisory	Severity	Effective Date	Escalation Date	Title	Location	Action
EI 0100	A2	06/11/2021		014	A	Inspection
EI 0286	XX	07/21/2021		QA-7-21.1	4	Inspection
EI 0360	A2	07/27/2022	07/28/2023	QA		Inspection
SH 4023	XX	03/23/2022		QA		Inspection
IN 3001	A9	05/28/2021		Informational Advisory for Rule 95 Incidents		Inspection
IN 3002	A9	05/28/2021		Informational Advisory for Rule 96 Incidents		Inspection
IN 3004	A9	05/28/2021		Informational Advisory for Rule 108 Incidents		Inspection

EI 0345	A1	06/08/2022	09/14/2022	QA InitPrioritization		Inspection
Launch Equipment Advisory						

Note: When you select an **Inspection** link, the Repair and Inspection Reporting portlet opens the Equipment Advisory Inspection entry field to enable you to input a new inspection (refer to [Exhibit 15](#)).

Select the refresh icon () to update the Equipment Advisory Notices portlet after submitting inspections or repairs.

To view the complete Equipment Advisory data for the selected Equipment ID, select the **Launch Equipment Advisory** link at the bottom of the portlet and query the Equipment ID. Refer to the [Equipment Advisory User Guide](#) for information about performing an Equipment ID query in Equipment Advisory.

Using the Damaged and Defective Car Tracking Portlet

The Damaged and Defective Car Tracking portlet displays DDCT information if you are party to the incident as shown in [Exhibit 24](#). If you are not party to the incident, no results are displayed.

Exhibit 24. Damaged and Defective Car Tracking Sample

Damaged and Defective Car Tracking							
Incident ID	Incident Date	Originating Road	Car Mark Owner	Interchange Rule	Defect	Status	
NS00334728	07/10/2019	NS	RAIL	102	Y	Open	
Launch DDCT							

Note: No actions are available from this portlet. You must report repairs in DDCT.

To view the complete DDCT incident data for the selected Equipment ID, select the **Launch DDCT** link at the bottom of the portlet and query the Equipment ID. Refer to the [DDCT User Guide](#) for information about Equipment ID queries and incident queries.

Using the Mileage Portlet

The Mileage portlet displays mileage information from the Event Repository to the car owner. This portlet can show the actual computed mileage, “No Data”, or “Very Few Miles” (if the data is confidential).

- Application Dt (Date) is the repair date reported by the customer.
- From Dt (Date) is the earliest recorded movement date
- To Dt (Date) is the latest recorded movement.

If Components have been added to an Equipment ID, mileage and dates of component application are shown ([Exhibit 25](#)).

Exhibit 25. Mileage with applied Wheelset Components

Mileage 				
Equipment Miles 10820 From 03/24/2016 To 12/20/2016				
Component Miles				
Component	Miles	Application Date	From Date	To Date
WHEELSET 1	10820	01/24/2016	03/24/2016	12/20/2016

Note: This information is confidential and is only available to the car owner. No actions other than sorting are available from this portlet. You can obtain detailed component data from Umler. Refer to the [Umler User Guide](#) and the [Component Tracking User Guide](#) for more information.

Accessing the User Guide

To open the user guide for Equipment Health View, select **User Guide** from the menu bar. The user guide opens in a new browser window. You can view, search, or print the user guide. When finished, close the browser window (✕) to return to the Home page.

Note: Other reference materials (webinar slides, demos, and FAQs) are also available on the Railinc web portal at <https://public.railinc.com/products-services/equipment-health-view>.

Glossary

AAR—Association of American Railroads

DDCT—Damaged and Defective Car Tracking system. A damaged car is one governed by Interchange Rule 107. Such cars are badly damaged or destroyed. A defective car is one governed by Interchange Rule 108. Such cars require general repairs in excess of 36 hours including trucks or 25 hours excluding trucks.

EHMS—Equipment Health Management System.

Equipment Advisory—System that handles AAR Equipment Advisory notices.

Equipment Health View (EHV)—A dashboard-style application that provides data from several Railinc applications regarding the health status for specified equipment IDs.

Event Repository—Railinc database of train movements and billing data.

Mileage—Mileage information from the Event Repository. Can also show mileage and dates of component application.

Repair Service—Railinc process that sends data from EHV to the corresponding Railinc system.

Umler[®]—Universal Machine Language Equipment Register (UMLER)
